If the steam engine is the icon of the industrial revolution, its most famous incarnation is the steam driven locomotive. The union of steam and iron rails produced the railways, a new form of transport which boomed in the later nineteenth century, affecting industry and social life. The Development of the Railways

Industrial Locomotives & Railways of the South and West of ...

Along with this came the necessity for non-mainline railways: branch lines and industrial railways, to keep railway companies and other businesses active and working. From the mid-1800s to the 1960s, steam locomotives were built by companies for industrial use or for use by private contractors. Many of these locomotives are preserved today, making up the majority of preserved steam locomotives in the United Kingdom.

List of preserved British industrial steam locomotives ...

Two 0-6-0 locomotives were built by Mitsubishi Heavy Industries for industrial service for the Ohai Railway Board in 1967. ORB 1 was withdrawn in 1989 due to heavier trains and was replaced by DJ3303. In 1990 the New Zealand Railways Corporation took over the Ohai Railway Board's section of the Wairio Branchline.

Locomotives of New Zealand - Wikipedia

Originally founded in the Midlands, the Industrial Locomotive Information Section of the Birmingham Locomotive Club (BLC) is the forefather of the Industrial Railway Society (IRS), which for many years has been the leading organisation in Britain devoted to the study of industrial and heritage railways and locomotives. The industrial railway scene for many was considered to be of secondary importance and, had it not been for the BLC/IRS members and photographers over the decades, some of ...
